ABOUT LOTUS PRODUCTS

Lotus is a modern, playful brand that appeals to a younger audience while staying rooted in traditional fermentation and brewing methods.

The Lotus range is a more commercial product line, offering approachable flavors based on familiar tastes rather than extreme or experimental combinations. This makes the products accessible to a wide audience and suitable for everyday enjoyment.

All products are developed and produced in-house, giving us flexibility and openness to new ideas and flavors. They are traditionally fermented and brewed, then gently pasteurized to ensure safety while retaining the beneficial effects of fermentation, particularly for digestion.

Pasteurization also allows for easier distribution and storage, making Lotus products more practical for wider market reach without compromising quality.
